Better Business

Largest Circulation of any Trade Paper in Western Canada

Advertising to The Trade

has been neglected in Western Canada of late and this is one factor that has caused dullness in business. You may advertise to the general public and get demand for your goods but—

Unless the dealer has your goods on the shelf when the customer asks for them by name, how can the sale be made? After one or two attempts the customer thinks it is no use and ceases to ask; merely takes any kind offered him instead of the Brand you have carefully taught him to ask for.

Specialised Trade Papers

may reach the specialised stores and the heads of departments in large institutions, but the owner or manager of the general store, or smaller shop, cannot take a trade paper for every line of goods carried; nor does he read them when sent free, their highly technical material does not appeal to him.

But he does read "Better Business" which goes not only to the specialised stores but to the general stores, over 1700 of them, all over the West, and carries reading matter suited to this field.

Every Advertising Campaign in Western Canada should include "Better Business" and reach the large volume of trade handled by the general stores and missed when advertising is placed in newspapers only, or when appeal to the trade is confined to specialised journals. : : : :

McClary's Electric Ranges

The Quick, Sanitary, Safe and Economical Way to Cook

McClary Electric 818 E. S.

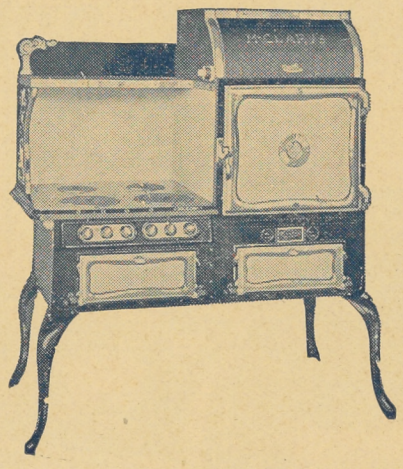
Heating capacity of elements as follows:—

Cooking Surface

2 9" elements 1400 watts each
2 6" elemenls 850 watts each
Maximum capacity 68 amperes.

Oven

2 1250 watts each
Size of oven 18x18x15 inch
Warming closet, 1 element 600 watts.



THIS is a special type of Range that will give excellent service. It has white enameled panels, nickeled door frames and porcelain switch handles. Four heating elements on top; two in oven. White enameled splash back and nickled front legs.

Seventy years' experience as master builders of stoves and ranges stand behind the New McClary Electric. Always in the lead of the field in improving and perfecting the stove, McClary inventive genius, manufacturing skill and high ideas of quality are embodied in their electric ranges. Improved simplicity and efficiency are "built-in" features. Long service is the natural result of thoroughness of construction. There is a size for every cooking requirement.

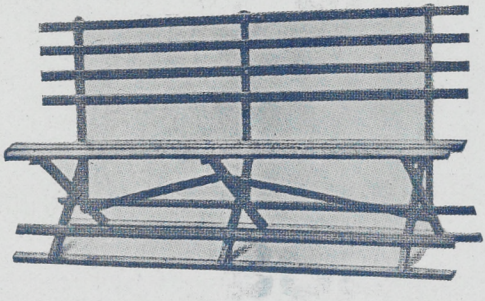
Lawn Rollers

Without a good Roller, a smooth, even lawn is impossible. The Roller illustrated is on the lines of the best English makes. Rounded edges so that it will not cut or tear the turf. 20 inches in diameter by 20 inches wide. Every Roller made in two sections. Handle stands straight up when not in use. Made in 250 lb. and 350 lb. sizes for ordinary lawns. Special Rollers for Cricket, Tennis and Rowing Clubs.



Lawn Settees

Comfortable and will stand hard usage. Well braced—can be folded for storage. Foot-board to protect grass and keep feet from damp. Length 6 feet; weight 40 lbs. **400 of this pattern supplied City of Winnipeg.**

Lawn Vases

Beautiful and lasting ornament for lawns, verandahs, balustrades etc. Painted with handsome Aluminum Bronze. Gives distinction and "class" to your lawn or garden.

Nine of the Principal Cities and Municipalities of Western Canada are Standing Advertisements of the merits of the

Warrenite-Bitulithic Pavement

The Ideal Boulevard

This pavement is constructed by the latest scientific process, and excels all others in durability, ease of maintenance, and is more economical than Block.

Its rough gritty surface makes it the ideal pavement for driving and motoring. Horses step out freely without fear of slipping, and motor cars do not skid when the pavement is wet.

Introductory

THIS FORTY-FOURTH issue of the Greater Winnipeg City Directory comprising the City proper, Elmwood, St. Boniface, Norwood, St. Vital, Fort Garry, St. James, St. Charles, Assiniboia, East and West Kildonan, is presented to the public with the belief that it will meet the demands of the most exacting and will fulfill the requirements of all its users.

The information in this book is gathered as far as possible by actual canvass, and is compiled in a way to ensure maximum accuracy. While the publishers will in no way be held responsible for any errors that may occur, they will be glad to have any inaccuracies brought to their attention, so that they may be corrected in succeeding editions.

The canvass for the present book was made under favorable conditions, with a crew of efficient canvassers, under the immediate supervision of carefully trained examiners.

The results of the canvass were most satisfactory and the manner in which the information checked in, proved the thoroughness of the work.

Upon examination and use as a work of reference, the directory will be found to contain a thorough and complete store of information regarding all the interests of the city. It is devoted to the advancement of all the city's vital interests and has in each issue kept pace with its progress.

The library of City directories which is maintained by the publishers at their offices, for the use of its patrons, embracing directories of all the principal cities of the United States and Canada, has proven a most valuable asset to the City of Winnipeg, for through reference to the books in this library, information for almost any business or person in the United States or Canada may be obtained.

Through the exchange of directories with the various directory libraries throughout the United States and Canada and the sale of the Winnipeg Directory to many institutions, hotels and stores in large cities, the directory is circulated throughout the country and serves as a lasting advertisement for our city.

POPULATION

The canvass for the Winnipeg Directory includes the entire City, so that the name of each person employed should be taken twice; once at the dwelling and again at the place of business. After the canvass has been completed, this information is compiled and it is necessary that there be two slips for each person employed. The information taken at the residence and place of business is compared before the duplicate is laid aside. When a discrepancy is found, a special messenger is dispatched to correct the conflicting information, or if the name has not been taken at both places, to retake it at the home or business place.

The new information is checked with the previous directory and each name in the old directory is accounted for.

It is this careful superintendence and revision which makes the directory estimate of population higher than the census figures.

The directory estimate of population is based on the actual number of names contained in the book, which is multiplied by a common multiple to allow for the married women and small children whose names do not appear.

Based upon the names contained in the pages of this book, it is estimated that the population of Greater Winnipeg is 283,852. This includes considerable territory beyond the city limits, which is canvassed in order that the names of all people doing business in Winnipeg may be obtained for the directory. There is an increase of 1,034 since the publication of the 1921 edition of the directory.

The Publishers regret the delay in date of issue, but beg to inform their subscribers it was due solely to labor trouble over which they had no control.

Respectfully, The Publishers,

March 24th, 1922. HENDERSON DIRECTORIES, LIMITED.

City of Winnipeg

The City of Winnipeg is the capital of the Province of Manitoba, Canada.

The name WINNIPEG has its origin in the Indian Cree name given to the lake 40 miles north, meaning "Win," muddy, "nipee," water.

Winnipeg is situated in Latitude 49° 54' N., Longitude 97° 08' W., at the confluence of the Red and Assiniboine Rivers; 40 miles south of Lake Winnipeg and 60 miles north of the boundary line between Canada and the United States of America, almost midway between the Atlantic and Pacific Oceans and at an altitude of 760 feet above the seaboard level of New York.

From a Hudson's Bay trading post (Fort Garry) in 1870, with a population of 215, Winnipeg has grown to the size and finish of a first class city of 283,852 people. When the City was incorporated in 1873 there were 1,869 inhabitants. In 1878 steam railway connection from St. Paul, Minn., had reached a point just across the river from Winnipeg; and in 1886 railway communication was established over the Canadian Pacific Railway from the East. With the advent of railway connections a steady stream of travel and trade with influx of population was started and has resulted in the building up of a City of a size and importance that is exceeded by only two cities in the Dominion of Canada.

Winnipeg is now the greatest grain centre on the American continent, and the financial, commercial, wholesale and manufacturing centre of the middle west; owing to its geographical position, its very complete railway facilities, with branches reaching out in very direction, it affords great possibilities for trade in the province and the North-West and an inducement for the establishment of manufacturing and other industries. In addition to the many other advantages Winnipeg supplies, through its Municipal Hydro-Electric system, the cheapest electric power of any city in America.

The source of Winnipeg's new water supply is Shoal Lake in the northwest angle of the Lake of the Woods, having a drainage of about 360 square miles and water surface of 107 square miles. Shoal Lake is connected with the main lake at Ash Rapids.

The Lake of the Woods has a drainage area of about 27,700 square miles and a water surface of about 1,500 square miles, the drainage basin of Shoal Lake—360 square miles.

The Lake of the Woods constitutes an enormous reservoir of pure and soft water, situated 300 feet above the City of Winnipeg within one hundred miles of the City.

The new aqueduct is capable of delivering to Winnipeg 85 million gallons of soft water per twenty-four hours.

The Winnipeg Stock Yards are the largest in Canada, and represent an investment of over $1,000,000. There are five and one-half miles of alley-ways, six and one-half miles of railway track, six miles of sewers, and five miles of watermains at the stock yards.

Winnipeg has 52 public schools, with an attendance of 36,126; 6 colleges; the Provincial agricultural college, built at a cost of $4,000,000.00; the University of Manitoba; art gallery; bureau of arts and arts museum; permanent exposition of products manufactured in the city; 3 libraries with 32 branches.

The City of Winnipeg dominates the markets of the entire Western Provinces of Canada. Her geographical situation makes her the pivot point from which the trade of this vast inland empire swings. Winnipeg holds the keys to the world's greatest growing market. She is the veritable pulse of trade west of the Great Lakes. Nothing can change this fortunate situation. No force can relieve this "keystone of Western trade" of the unique advantages she possesses in the Western world. Experience has long since proven that goods passing from East to West must of necessity go through Winnipeg, and so too the products of the prairies must find their outlet here as well. Thus Winnipeg has become the greatest transportation centre in the Dominion of Canada.

WATERWORKS

The first water works system in the city was installed and operated by a private concern, The Winnipeg Water Works Company, the source of supply being the Assiniboine River, and the pumping station was located at Armstrong's Point. This Company obtained its charter on December 30th, 1880, but the works were not put in operation until 1882. The franchise was exclusive and for a term of twenty years.

In April, 1899, the city purchased the Water Works Company's plant for the sum of $237,650. Immediately upon taking over this system the city decided to change the source of supply, and an artesian well system was placed in operation in October, 1900. The well system consisted of a chain of wells on a line running in a northwesterly direction from the city. The pumping capacity of the several wells was in excess of 12,000,000 gallons per day. Upon completion of the Shoal Lake Water System the city discontinued the use of the artesian wells, but several of the larger wells are maintained as a standby ready for operation in case of interruption to the new supply.

Shoal Lake water was turned in to the McPhillips Street reservoir at 10.30 a.m. on March 29th, 1919, and distribution through the city mains commenced on April 5th, 1919.

The pumping station and reservoirs are located on McPhillips Street, north of Logan Avenue.

Reservoirs

No. 2 ..... 6,000,000 gals. capacity
No. 3 .....18,000,000 gals. capacity

The fire service water works has a capacity of 12,960,000 gallons per day against 300 lbs. pressure. This service is operated by 2,500 h.p. gas engines. There are ten miles of high pressure water mains in the business districts and 157 special hydrants.

Henderson's Winnipeg Street and Avenue Directory 1922

This section of the Directory is presented in condensed form. Full information will be found in the Alphabetical Section.

AVENUES all run East and West, and are numbered under 200 East of Main Street, Main to Princess 200 to 300, West of Princess 300 and upwards.

STREETS running North and South are numbered from the Assiniboine River as a base Northwards, and again from Notre Dame as a base Northwards.

The word "Street" is always implied.
